J.P. Morgan Securities LLC:

Carrying Brokers US/Non-US	Affiliated with FCM Y/N
J.P. Morgan Securities plc	Y
J.P. Morgan SE	Y

J.P. Morgan Securities LLC permits certain customers to establish and maintain separate accounts with JPMorgan. Such separate accounts may be: (i) managed by different asset management firms, introducing brokers or associated persons; (ii) managed as separate investment portfolios by the same asset management firm, introducing broker or associated person; (iii) subject to liens in

connection with operating loans that contractually obligate an FCM to treat the accounts separately; or (iv) otherwise required for regulatory or appropriate business purposes. Subject to the terms and conditions of CFTC Letter No. 19-17, JPMorgan treats such separate accounts as accounts of separate entities. Among other things, JPMorgan may calculate the margin requirements for each separate account independently from all other separate accounts of the same customer and may disburse excess funds from one separate account notwithstanding that another separate account is under margined.

Among other terms and conditions set out in CFTC Letter No. 19-17, JPMorgan is required to advise its customers that are permitted to maintain separate accounts that, in the unlikely event of JPMorgan's bankruptcy, the customer will be treated no differently from other customers, as a result of having maintained separate accounts with JPMorgan. In particular, all separate accounts maintained for or on behalf of any such customer will be combined in determining such customer's rights and obligations under the applicable provisions of the U.S. Bankruptcy Code and Part 190 of the Commodity Futures Trading Commission's Regulations.

CFTC Letter No. 19-17 also clarified CFTC Regulation 1.56, stating that any agreement containing provisions limiting an FCM's recourse to less than all assets of the beneficial owner of an account is an express violation of Regulation 1.56. In accordance with the subsequent CFTC Letter No. 20-28, with respect to any agreement containing such provision, JPMorgan (as an FCM) is required to provide a written disclosure to the beneficial owner that (a) Regulation 1.56 provides that the FCM may not represent that it will (1) guarantee the beneficial owner against loss, (2) limit the loss of the beneficial owner, or (3) prohibit the FCM from calling for or attempting to collect initial and maintenance margin as established by the rules of the applicable board of trade, and (b) explains any reliance upon the operation of applicable law and severability contractual provisions of such agreement with regard to compliance with Regulation 1.56.

PERMITTED DEPOSITORIES AND COUNTERPARTIES

FCM's policies and procedures concerning the choice of bank depositories, custodians and counterparties to permitted transactions under § 1.25.

J.P. Morgan Securities LLC exercises due care in the selection of bank depositories, custodians and counterparties to permitted transactions under CFTC Regulation 1.25.

JPMorgan conducts extensive due diligence during the depository selection process. As part of the selection process, JPMorgan considers numerous factors within its due diligence criteria including, but not limited to, the financial strength of the entity, concentrations of expected asset deposits, the clearing and/or custody operational environment, volume capacity, depository, regulatory and supervisory coverage, internal/external audit coverage, contingency plans, and applicable insurance coverage. Initial due diligence assessments by professionals in the JPMorgan Credit and Network Management teams form an essential part of the selection process.

Additionally, before a new market is offered, or a new clearing house or broker relationship is established, JPMorgan conducts a thorough review that includes due diligence, internal

governance, and senior management approval to determine whether or not a specific market will be offered and if a counterparty meets our criteria and standards for consideration. Careful consideration is also given to how the market will be proactively managed with respect to regulatory requirements.

(iii) risks to FCM created by its affiliates and their activities, including investment of customer funds in an affiliated entity; and

J.P. Morgan Securities LLC – Risks to the FCM created by its affiliates are addressed by the Futures Industry Association, FAQ on Protection of Customer Funds, available at <https://www.fia.org/resources/fia-issues-fourth-version-guide-customer-fund-protections>. The below text is based on the FIA's FAQ response:

The use of affiliates to carry and clear foreign transactions provides benefits but also presents risks. Provided the affiliate meets the criteria the FCM has established for depositories holding Customer Funds, an FCM may use one or more affiliates to carry and clear transactions on foreign boards of trade, including in major markets such as the United Kingdom, Hong Kong and Singapore. A customer is encouraged to consider the risks as well as the benefits of effecting transactions on foreign boards of trade through the FCMs' affiliates.

Many FCMs believe customers receive significant benefits if trades are executed through affiliated foreign brokers. FCMs will necessarily have far more information about an affiliated foreign broker, e.g., its internal controls, investment policies, customer protection regime, finances and systems, and are better able to exert influence over an affiliated foreign broker. Customers, for their part, often prefer to deal with one integrated company, whose unified balance sheet and financial statement permit the customers to more easily assess the potential risk of trading through that FCM.

In addition, an FCM generally is able to provide services to its customers more efficiently and more effectively if trades are executed and cleared through one or more affiliates. An FCM and its affiliates customarily use the same systems, which permit straight-through processing of trades, thereby enhancing certainty of execution (including give-up transactions), facilitating reconciliations and reducing errors (or the time necessary to resolve errors). Straight-through processing also facilitates an FCM's ability to (i) manage the risks of carrying its customers' positions, and (ii) comply with position limit and large trader reporting requirements, both in the US and in foreign jurisdictions. Moreover, an FCM that executes transactions on foreign boards of trade through an affiliate may be able to offer certain value-added services, including a platform for direct access to certain markets and single currency margining.

Nonetheless, the use of affiliates also poses certain risks. Because the activities of a US FCM and its affiliates are integrated, the failure of one such entity may cause all of the affiliated companies to fail or be placed in administration within a relatively brief period of time. As is the case if an unaffiliated foreign broker were to fail, each of these companies would be liquidated in accordance with the bankruptcy laws of the local jurisdiction. CFTC Regulation 30.7 Customer Secured Amount Funds held with such entities in support of foreign futures and options trading would not receive the same protections afforded Customer Funds under the Commodity Exchange Act and the US Bankruptcy Code. If, on the other hand, a defaulting US FCM had cleared its 30.7 Customers' foreign futures and foreign options transactions through unaffiliated foreign

brokers, the foreign broker likely would not have failed as a result of the FCM's failure, and the defaulting FCM's trustee in bankruptcy could have directed the foreign broker to liquidate all customer positions and return the balance to the trustee for distribution to customers.

In either case, however, in the event of the failure of a foreign broker, return of 30.7 Customer Funds to the US will be delayed and likely will be subject to the costs of administration of the failed foreign broker in accordance with the law of the applicable jurisdiction, as well as possible other intervening foreign brokers, if multiple foreign brokers were used to process the US customers' transactions on foreign markets.

1.55(o)(4) Additional financial information on all FCMs.

Additional financial information on all FCMs is also available on the Commission's website at <https://www.cftc.gov/MarketReports/financialfcmdata/index.htm>

1.55(o)(3) Financial information regarding the FCM, including how the FCM invests and holds customer funds.

Customers should be aware that the National Futures Association ("NFA") publishes on its website certain financial information with respect to each FCM. The FCM Capital Report provides each FCM's most recent month-end adjusted net capital, required net capital, and excess net capital. (Information for a twelve-month period is available.) In addition, NFA publishes twice-monthly a Customer Segregated Funds report, which shows for each FCM: (i) total funds held in Customer Segregated Accounts; (ii) total funds required to be held in Customer Segregated Accounts; and (iii) excess segregated funds, *i.e.*, the FCM's Residual Interest. This report also shows the percentage of Customer Segregated Funds that are held in cash and each of the permitted investments under Commission Rule 1.25. Finally, the report indicates whether the FCM held any Customer Segregated Funds during that month at a depository that is an affiliate of the FCM.

The report shows the most recent semi-monthly information, but the public will also have the ability to see information for the most recent twelve-month period. A 30.7 Customer Funds report and a Customer Cleared Swaps Collateral report provides the same information with respect to the 30.7 Account and the Cleared Swaps Customer Account.

The above financial information reports can be found by conducting a search for a specific FCM in NFA's BASIC system (<http://www.nfa.futures.org/basicnet/>). With respect to J.P. Morgan Securities LLC, you can enter the NFA ID (0000815) and then click "Search". The reports can be found under the heading "FCM Financial Data Reporting" on the FCM's BASIC Details page.

1.55(k)(11) A summary of FCM's current risk practices, controls and procedures.

- See the Firmwide Risk Management section of the Annual Report by following the below link and downloading the Annual Report <https://www.jpmorganchase.com/ir/annual-report>

J.P. Morgan Securities LLC – The FCM, J.P. Morgan Securities LLC, has created Risk Management Programs in accordance with CFTC Rule 1.11. This program, which has been sent to the CFTC, is comprised of internal JPMorgan policies and takes into account market, credit, liquidity, foreign currency, legal, operational, settlement, segregation, technological,

capital, and other applicable risks. These policies are designed to address requirements found in the Commodity Exchange Act and CFTC Rules including Parts 1, 22, and 30, as well as the rules of our Designated Self-Regulatory Organizations, NFA and Commodity Exchange, Inc., Division of the CME Group.

Where applicable these policies provide a description of the risk tolerance limits set by the FCM and the underlying methodology in the written policies and procedures.

The Risk Management Programs contain policies to address each of the risk categories listed above. Below you can find a summary of the types of policies that have been included in the Risk Management Program. The information below is not exhaustive and is designed to illustrate the FCMs' risk practices, controls and procedures.

- **Segregation Risk** – The firm maintains policies and controls to ensure that customer funds are treated in accordance with the maintenance, reporting and recordkeeping requirements pursuant to Section 4d of the Commodity Exchange Act and the related regulations. These policies include the determination, maintenance, monitoring and reporting of the firms' residual interest deposited in segregation for the benefit of the FCMs' customers. Additionally, these policies and controls cover the firm's due diligence program for depositories holding customer funds and the FCM's investment of customer funds pursuant to CFTC Regulation 1.25.
- **Capital Risk** – Policies that document the monitoring and maintenance of appropriate levels of regulatory capital as well as policies for timely escalation should regulatory capital fall below certain thresholds.
- **Credit Risk** – Policies that cover onboarding, margin, risk monitoring and escalation procedures, monitoring of concentration/liquidity risk of open positions, limits management, and risk management. Additionally, the credit risk policies contain the approval principles and outline the periodic credit reviews required to maintain a current risk assessment of the firm's credit exposures as part of its ongoing credit risk management process.
- **Legal Risk** – Policies that set forth the minimum record retention requirements that apply to an FCM and its personnel, internal guidelines with respect to documenting transactions with new futures and options and OTC clearing clients, and the review process for determining netting and collateral enforceability rights of the FCM under relevant agreements based on customer jurisdiction and institution type as well as vis-à-vis the relevant CCPs pursuant to the CCP rulebooks.
- **Liquidity Risk** – The firm maintains liquidity risk management policies and procedures for managing liquidity through actual stress events, as well as delineating roles and responsibility with respect to liquidity risk management, governance and control. These liquidity risk management policies and procedures seek to ensure that the FCMs' core businesses are able to operate in support of client needs, and meet contractual and contingent obligations through normal cycles as well as during market and idiosyncratic stress events.
- **Market Risk** – Maintains guidance documentation that establishes and implements the market risk management framework to measure, monitor, control and report potential market risk exposures generated by JPMS LLC in its principal capacity as FCM.

- **Operational Risk** – The firm maintains an overall framework that includes oversight and governance, policies and procedures, consistent practices across the lines of business, and firmwide risk management tools intended to provide a sound and well-controlled operational environment. The goal is to keep operational risk at appropriate levels, in light of the firm’s financial strength, the characteristics of its businesses, the markets in which it operates, and the competitive and regulatory environment to which it is subject.
- **Settlement Risk** – Policies cover onboarding and margin procedures, risk monitoring and escalation procedures, monitoring of concentration/liquidity risk of open positions, limits management, and FCM risk management.
- **Technological Risk** – Technological Risk establishes control requirements designed to prevent, detect, and react to conditions that could adversely impact the confidentiality, integrity, and availability of the firm’s information resources.
