DISCLOSURES FOR G-SII INDICATORS AS OF 31 DECEMBER 2023

## DISCLOSURE FOR G-SII INDICATORS AS OF 31 DECEMBER 2023

- According to the European Banking Authority (EBA) Guidelines on the specification and disclosure of systemic importance indicators (EBA/GL/2020/14), the EBA - with the assistance of relevant authorities - collects the information needed to identify global systemically important institutions (G-SIIs) in the EU.
- The EBA discloses the main indicators and the underlying data used in the identification and scoring process, but not ancillary data and memorandum items. Institutions qualifying as G-SIIs are also required to disclose the main indicators, but not ancillary data and memorandum items. The EBA Guidelines increase the transparency in the G-SIIs identification process and ensure a continued level playing field with respect to disclosure requirements between global systemically important institutions (G-SIIs) and other large institutions – in this regard J.P. Morgan SE – with an overall leverage ratio exposure measure of more than EUR 200 billion at the end of each year.
- The Basel Committee on Banking Supervision (BCBS) assesses the systemic importance of banks in a global context.
- The indicators provided hereafter are calculated based on specific instructions by the BCBS and thus may be not directly comparable against other disclosed information. It has to be noted that BCBS instructions are based on the regulatory, not the accounting consolidation scope.
